Turbo air

Re: Price Adjustment 2021

Dear Valued Partners,

Undoubtedly, you are aware of the severe difficulties associated with the Global Supply Chain that, in all likelihood, has impacted everyone's business, as we have never previously experienced. Turbo air has been affected by substantial material increases and nearly every part required to produce all products. Additionally, the shipping cost has skyrocketed to excessive levels, and labor expense continues to escalate.

Despite these severe conditions, we have successfully maintained more than satisfactory inventory levels at all of our thirteen (13) national warehouse locations. The most significant aspect in supporting our inventory has been sustaining production at our four (4) manufacturing facilities in the USA and Asia.

Due to the above referenced unprecedented material, labor, and shipping increase, it will be necessary to adjust our prices by 7% effective July 1, 2021. The price change will apply to all **Self-contained refrigeration, Radiance, German Knife, Green World, along with accessories and parts.**

On orders received before July 1st for immediate shipment will be invoiced at the current price, and orders received after the effective date will be subject to the new pricing.

It's regrettable but necessary we increase prices. However, as described in this notice, virtually all aspects of our business have been impacted with severe inflationary expense never before seen in Turbo Air history. We will be sending out an updated price list, and Auto Quotes will be adjusted by July 1st.

Again, thank you for your exceptional support as we navigate the Global Supply Chain challenges and Covid-19.

Sincerely,

Brian S. Kim
Chief Engineering Officer & CEO

Natural refrigerant is used in all Turbo Air refrigerators

Turbo Air is committed to the environment with innovative and eco-friendly technology!

By utilizing our innovative, eco-friendly technology, Turbo Air has now replaced all previous refrigerants with climate-friendly hydrocarbons R-600A (Isobutane) and R-290 (Propane). In our efforts to protect our environment we have decreased energy consumption by 25%.

Why Turbo Air ?

Only at Turbo Air, Only in the World

Turbo Air's 2 & 3 Glass Door Freezers are powered by 115V. Not only is our 115V simple and easy to plug in and operate, it also saves customers over \$1,000 in electrical line installation costs required for 220V powered glass door freezers. We are the only company to have achieved this feat, which is proof of our dedication to energy efficiency and the environment.

No Electrical Cabinet Heater Needed

Electrical heaters in glass door freezers operate 24/7 in order to prevent water flow to the cabinet surface. This causes unnecessary energy consumption, and sometimes is the reason behind overheating. Instead of frame heaters, Turbo Air glass door freezers harness the heat produced by the compressor during the condensing stage, eliminating any unnecessary energy consumption as well as providing the most efficient freezer performance available.

Condensate Water Cooling System

Unique to Turbo Air Reach-In products, our anti-corrosion pipes are coated on the surface with a special treatment, allowing the excess condensate waters to cool down the pipe's hottest area during the refrigerant compression process. This not only saves energy, but also eliminates the need for additional drains, which prevents slippery floors from becoming a safety issue.

Preventing Heat Transfer

Triple pane vacuum glass and plastic frame material are used to prevent heat transfer and to increase energy efficiency. Specially gilded aluminum exterior materials have both beauty and durable practicality.

Early Warning System

Malfunctions are generally recognized when an increase in temperature is detected, 2 to 3 hours after the refrigerator has stopped running. This causes the user to become aware of malfunction issues the next morning when the contents have already spoiled. To eliminate this risk, Turbo Air units have a warning system in place that diagnose and monitor itself for risk factors, which gives early warning signals to preserve contents and prevent future problems.

Door Pressure Release Device

Pressure relief doors are designed to eliminate vacuum pressure and allow easy, instant door opening.

Digital Temperature Control System

Digital technology provides precise and consistent temperatures throughout the cabinet. This allows food products to remain fresh over an extended period of time.

All temperature information provided is obtained through NSF standard testing environment.

Each of our products certifications may differ under certain specifications and various options.

Made in U.S.A.

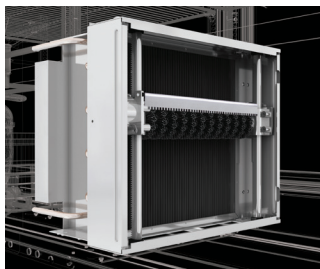

Supporting American workers

At the foundation of Turbo Air's PRO Series is all-American, quality craftsmanship

PRO Reach-Ins

- Digital temperature control & monitor system
- Hydrocarbon Refrigerants (R-290)
- Cold air distribution system
- All stainless steel cabinet construction
- LED interior lighting
- Top mount compressor
- USB temperature data storage

Patented, Maintenance free

Self-Cleaning Condenser Only at Turbo Air

The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust buildup and making it possible to always maintain the highest efficiency while saving additional energy.

Refrigeration Reinvented **Turbo air** REFRIGERATOR MANUFACTURER

Digital Type Underbar Equipment

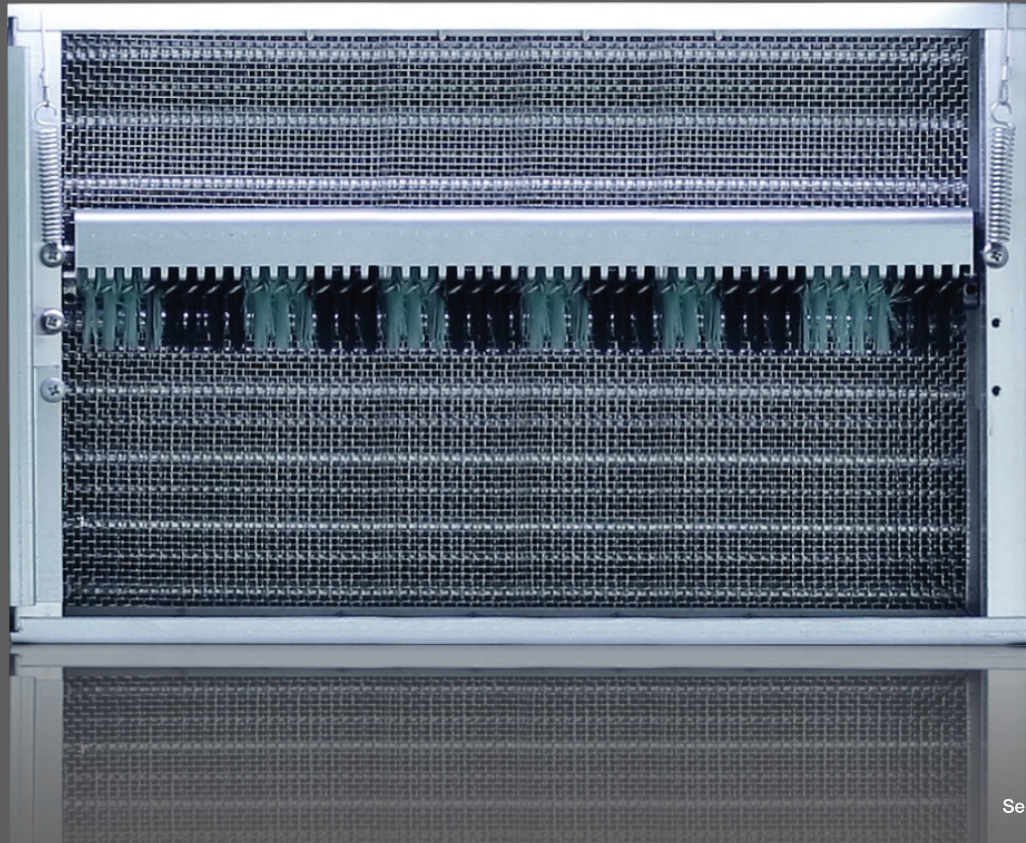

- Self-Cleaning Condenser
- LED Interior Lighting (Back Bars)
- Digital Temperature Controller (except 1 door models)
- Forced air cooling system
- Hydrocarbon Refrigerants (R-290/R-600a)
- Stainless steel cabinet construction
- CFC Free Polyurethane insulation
- Heavy duty, PE coated dividers
- Double pane glass doors with Low-E glass (Back Bars - SGD models only)
- 3 years parts and labor warranty, additional 4 years warranty on compressor

Elevate your expectations with Turbo Air

We fulfill your every need and beyond
with a wide selection of 1200+ refrigeration units.

Let's Watch Turbo Air's
Self-Cleaning Condenser Video!

Patented, Maintenance free Self-Cleaning Condenser only at Turbo Air

The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust build-up and maintaining the highest efficiency while saving additional energy.
