REFRIGERATOR MANUFACTURER  
**Turbo air**

## **RE: Price Adjustment November 1, 2021**

Dear Valued Partners,

Since our last notice the Global Supply Chain difficulties have continued to spiral out of control. Base metals, alloys, stainless steel, copper, labor and transportation have reached record levels. Unfortunately, we do not believe this trend will change or slow through the balance of the year. As a result of these rapidly escalating costs Turbo Air will be instituting a 7% price increase.

Our adjustment will apply to all equipment and accessory categories, **effective November 1, 2021**. We strongly recommend you send in your order requirements, as soon as possible, so we are able to ship at the current pricing. Demand continues to remain high with all categories putting significant pressure on manufacturing and inventory levels. We will make every effort to fill all orders to the best of our abilities based on the conditions referenced above. Any orders placed before November 1st will have 14 days to ship, and back orders will also be honored through November 15th as well. All PO's placed on November 1st or later will have to be adjusted to November 1st pricing.

Turbo Air will be updating Auto Quotes on the effective date. Please contact your area representative with questions or for assistance, relative to this notice.

We greatly appreciate your outstanding support and will do everything possible to fulfill your refrigeration needs.

Sincerely,

Brian S. Kim  
Chief Engineering & Executive Officer

# Natural refrigerant is used in all Turbo Air refrigerators

*Turbo Air is committed to the environment with innovative and eco-friendly technology!*

By utilizing our innovative, eco-friendly technology, Turbo Air has now replaced all previous refrigerants with climate-friendly hydrocarbons R-600A (Isobutane) and R-290 (Propane). In our efforts to protect our environment we have decreased energy consumption by 25%.

## Why Turbo Air ?

### Only at Turbo Air, Only in the World

Turbo Air's 2 & 3 Glass Door Freezers are powered by 115V. Not only is our 115V simple and easy to plug in and operate, it also saves customers over \$1,000 in electrical line installation costs required for 220V powered glass door freezers. We are the only company to have achieved this feat, which is proof of our dedication to energy efficiency and the environment.

### No Electrical Cabinet Heater Needed

Electrical heaters in glass door freezers operate 24/7 in order to prevent water flow to the cabinet surface. This causes unnecessary energy consumption, and sometimes is the reason behind overheating. Instead of frame heaters, Turbo Air glass door freezers harness the heat produced by the compressor during the condensing stage, eliminating any unnecessary energy consumption as well as providing the most efficient freezer performance available.

### Condensate Water Cooling System

Unique to Turbo Air Reach-In products, our anti-corrosion pipes are coated on the surface with a special treatment, allowing the excess condensate waters to cool down the pipe's hottest area during the refrigerant compression process. This not only saves energy, but also eliminates the need for additional drains, which prevents slippery floors from becoming a safety issue.

### Preventing Heat Transfer

Triple pane vacuum glass and plastic frame material are used to prevent heat transfer and to increase energy efficiency. Specially gilded aluminum exterior materials have both beauty and durable practicality.

### Early Warning System

Malfunctions are generally recognized when an increase in temperature is detected, 2 to 3 hours after the refrigerator has stopped running. This causes the user to become aware of malfunction issues the next morning when the contents have already spoiled. To eliminate this risk, Turbo Air units have a warning system in place that diagnose and monitor itself for risk factors, which gives early warning signals to preserve contents and prevent future problems.

### Door Pressure Release Device

Pressure relief doors are designed to eliminate vacuum pressure and allow easy, instant door opening.

### Digital Temperature Control System

Digital technology provides precise and consistent temperatures throughout the cabinet. This allows food products to remain fresh over an extended period of time.

All temperature information provided is obtained through NSF standard testing environment.

Each of our products certifications may differ under certain specifications and various options.

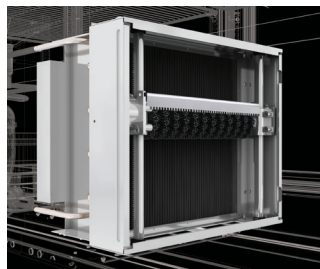

Made in U.S.A.

# Supporting American workers

At the foundation of Turbo Air's PRO Series is all-American, quality craftsmanship

## PRO Reach-Ins

- Digital temperature control & monitor system
- Hydrocarbon Refrigerants (R-290)
- Cold air distribution system
- All stainless steel cabinet construction
- LED interior lighting
- Top mount compressor
- USB temperature data storage

Patented, Maintenance free

### Self-Cleaning Condenser Only at Turbo Air

The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust buildup and making it possible to always maintain the highest efficiency while saving additional energy.

Refrigeration Reinvented **Turbo air** REFRIGERATOR MANUFACTURER

## Digital Type Underbar Equipment

- Self-Cleaning Condenser
- LED Interior Lighting (Back Bars)
- Digital Temperature Controller (except 1 door models)
- Forced air cooling system
- Hydrocarbon Refrigerants (R-290/R-600a)
- Stainless steel cabinet construction
- CFC Free Polyurethane insulation
- Heavy duty, PE coated dividers
- Double pane glass doors with Low-E glass (Back Bars - SGD models only)
- 3 years parts and labor warranty, additional 4 years warranty on compressor

# Elevate your expectations with Turbo Air

We fulfill your every need and beyond  
with a wide selection of 1200+ refrigeration units.

Let's Watch Turbo Air's  
Self-Cleaning Condenser Video!

## Patented, Maintenance free Self-Cleaning Condenser only at Turbo Air

The 'Self-Cleaning Condenser' cleans the condenser with a rotating brush that moves up and down 2-3 times a day, preventing any dust build-up and maintaining the highest efficiency while saving additional energy.
